SUMMARY

Rey is an MS Architecture student from the Philippines, currently based in California, where he is researching opportunities for circular communities in developing regions. He is a registered architect in the Philippines and has a graduate diploma in Marketing.

He is a designer with over seven years of architectural design experience, ranging from residential high-rise and mixed-use architectural design in Asia, sustainability, corporate communications, and architectural journalism. His graduate studies focused on tall buildings, wood construction, public health, and the business of design.
